

## Royal College of Psychiatrists' briefing NHSE ratings of clinical commissioning groups 27 January 2020

NHS England assesses the performance of all clinical commissioning groups (CCGs) across England through its Improvement and Assessment Framework (IAF).<sup>1</sup> This document, subject to regular updates on our Mental Health Watch website, will illustrate the state of play across three IAF service areas for all 207 CCGs in operation through the 2017/18 financial year, and the leadership ratings for 191 eligible CCGs for the first quarter of 2019/20.

### What are the areas covered in our selected IAF ratings?

Each clinical commissioning group is rated against a range of relevant measures to determine an overall rating for the particular IAF domain. Among the issues covered in the four areas monitored on Mental Health Watch are the following:

- **Leadership**
  - Staff engagement
  - Progress against Workforce Race Equality Standard
  - Working relationships at local level
  - Patient and public involvement in commissioning
  - Corporate governance
- **Dementia**
  - Estimated dementia diagnosis rate
  - Care planning and post-diagnosis support
- **Mental Health**
  - Recovery rates for Improving Access to Psychological Therapies (IAPT)
  - IAPT access rate
  - Performance against the Early Intervention in Psychosis (EIP) target
  - Inappropriate out of area placements
  - Crisis team provision
- **Learning Disabilities**
  - Completeness of the GP learning disability register
  - Dependence upon specialist inpatient care
  - Delivery of annual health checks for those with a learning disability
